

BYOD

PATIENT-CENTERED CONNECTED CARE

In today's always-on, connected world, one of the best ways to drive patient communication and engagement in a population health management program is via their mobile devices. Yet, those devices can be as unique as the patients themselves.

Vivify Pathways +Go solves the issue. As the first mobile, cloud-based, bring-your-own-device (BYOD) solution for patient-centered, connected care it creates a digital pathway to collaborative care on-demand, enabling you to meet patients where they are to help drive better health outcomes.

Bring Your Own Different

Vivify Pathways +Go liberates remote care from the "one size fits all" constraints of early population health programs. Now you can take care to a whole new level for every patient population – on the devices they use every day.

- **Enroll patients at any risk level** – from a joint replacement patient to the parents of infants in the most vulnerable stages of recovery
- **Your brand, your care plans** – choose from more than 75 disease-specific, yet easily modified care protocols, then add your own branding to build your visibility and reputation
- **Technology barriers removed** – interact with patients on the devices they already know and are comfortable with

Engage Every Patient on Every Device

Automated Recruiting

Automate outreach to program candidates via text or email delivered to any mobile device or PC.

Continual Stratification

Rather than relying on snapshots during office visits, you can discover patients' true health status on a daily basis – directly from the source and their preferred device.

Customized Care

Begin with more than 90 disease-specific clinical protocols that can be easily modified for each patient to drive better outcomes faster.

Monitor & Engage

Frequent engagement, paired with intelligent clinical escalation algorithms and intervention tools, leads to greatly improved outcomes and satisfaction.

Data Collection

Subjective and biometric data retrieval is made easier and more scalable, helping with pre-op assessments, post-discharge monitoring, disease management, and compliance documentation.

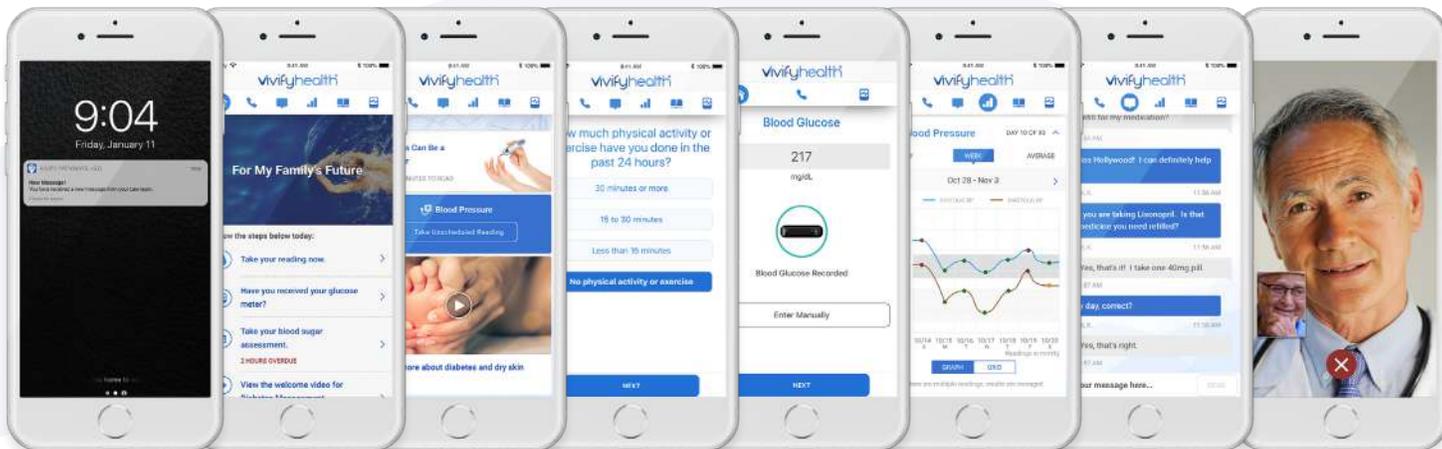

Continual Education

Deliver videos and articles on patients' conditions directly to their (or their family's) devices, making consumption easy to improve engagement. Share health tips, rehab best practices, medication literacy and more.

Virtual Visits

See more patients, right when they need to be seen, on the device screen of their choice. You can also conference in other caregivers while saving patients (especially those who have difficulty traveling) the inconvenience of an office visit.

Improving the Care of All Your Populations

With more than 600 hospitals and health plans under contract, the Vivify Pathways comprehensive, patient-centered connected care platform extends care beyond the four walls of the provider facility to include populations of any size, condition, and risk level. These solutions can be delivered to virtually any mobile device or PC, or via a fully managed Vivify Pathways +Home kit. Vivify Pathways is being used today in conjunction with a variety of programs, such as:

-  Preventable hospitalization and readmission programs
-  Any care transition or post-discharge program
-  Wellness programs
-  High-risk pregnancies
-  Transplant recovery

Vivify Pathways can also be easily customized to accommodate your unique business and reimbursement models, including programs for:

Comprehensive Care for Joint Recovery

Bundled Payments for Care Improvement

Chronic Care Management

Accountable Care Organizations

Ask us how you can take advantage of the new CMS 2019 RPM and CCM reimbursement rates.

Put your organization on the digital pathway to collaborative care on-demand with Vivify Pathways – the industry's only comprehensive, patient-centered connected care platform.
